Temperature Traceability

Using Blockchain to Prevent Counterfeit Drugs

The Technology

Varcode technology

Varcode has integrated a sensor into a barcode recorder, creating a disposable smart recorder for traceability and temperature monitoring:

- Dynamic Barcode - barcode changes based on temperature and time
- Unique, patented technology

Varcode Measurement Capabilities

Currently
Operational:

Time & Temperature
-18°C to +30°C

Roadmap:

Shock
(Acceleration
& Orientation)

Humidity

PH level

Why Varcode Uses Barcode Technology

Benefits:

World wide
standard

Billions of
readers
in use

Minimal
hardware
investment

Minimal
training

Supported by
smartphones

Improves
logistical
efficiency

Saves time
& reduces
error

Reduces
costs

Multiple Large Markets

Food

Pharma

Parcel

Chemical Products

The Varcode Solution: FreshCode™

FreshCode™ Temperature Recorder

Scanning Devices

Cloud Based Track & Trace Data

FCMS™ Management & Reporting Interface
